**Biology Living-Learning Community**

Program Overview
The purpose of the Bio Living-Learning Community (BioLLC) is to help freshmen intended Biology and Biochemistry majors succeed at ECU, in the major, and in their careers. The BioLLC will reach its goals by changing the institutional culture for the students so that they take full advantage of everything that a large university offers.

The components of the BioLLC include 1) living together in a group with a shared academic purpose and some shared courses, 2) having an RA in their major, 3) some classes scheduled on-site, and 4) informal interaction with faculty. Other programs such as an off-campus experience in the Fall semester may also occur.

Program Goals
Goals for the BioLLC are to:

- Create an environment that invites opportunities for formal and informal interactions between faculty, staff, and students
- Provide opportunities with paraprofessional staff who support and enhance the residential living experience
- Plan and implement programs and activities that integrate the in-class and out-of-class experience of Biology and Biochemistry majors. Opportunities include: peer mentoring, leadership and teamwork exercises, service-learning events, faculty and student events, block-scheduled classes with other Biology and Biochemistry majors
